SPECIALTY CAMPS

- **Owlets (Half Day):** Campers must be 4 years old by the first day of their session. The half day program runs 8:30am to 12:30pm and offers an introduction to summer camp, including animal encounters, mini hikes, swimming, and arts and crafts. This group consists of 10 campers and 2 counselors, and the Owlets have their own group space separate from full day camps.
- **Art in Nature:** Barn Owl (2/3) and Barred Owl (4/5) campers can let their creativity flow as they learn artistic techniques, how to use a variety of natural materials in their art, and how to find inspiration from the natural world. Art in Nature activities are in addition to core camp activities such as swimming, canoeing, archery, animal encounters, hikes, etc.
- **Mad Science:** BOOM! Barn Owls (2/3) get to go a little crazy in this science-focused specialty camp. Turn an average lemon into your own personal volcano; make your own sky-exploring bottle rocket. Discover and solve the mysteries of science by learning how the natural world works through exploration and fun experimentation. Mad Science activities are offered in addition to core camp activities such as swimming, canoeing, archery, animal encounters, hikes, etc.
- **Survival:** Barred Owl (4/5) and Great Horned Owl (6/7) campers have the opportunity to learn and practice outdoor skills like building shelters, navigating the woods, and tying knots. These activities are in addition to core camp activities such as swimming, canoeing, archery, animal encounters, hikes, etc.
- **Grow:** Barred Owl (4/5) and Great Horned Owl (6/7) campers will harvest, play, and discover the ins and outs of a sustainable produce garden. Campers will spend time partnering with and learning from CNC's Horticulture team by gathering ripe fruits and veggies, caring for our egg-laying hens, exploring the CNC Unity Garden, and by helping the Unity Garden impacts North Fulton Community Charities. Grow activities are offered in addition to core camp activities such as swimming, canoeing, archery, animal encounters, hikes, etc.
- **Travel Program:** The Travel Program is Camp Kingfisher's premier adventure-based camp for rising 8th and 9th graders. Day trips are packed with fun, personal challenges, and campers are learning to support a team of peers. Travel Program Campers will have fun exploring some of the natural wonders in Georgia and surrounding states. Some sample trips include hiking in North Georgia, rafting, tubing, kayaking, and urban biking. Each two-week session will be packed full of both water and land adventures. Proficient (not expert) swimming skills are a must for Travel Program campers.

SESSION THEMES

- **Adaptation Investigation:** Our environment is filled with so many kinds of plants and animals that must adapt to their habitat. People wear coats when it's cold and sunscreen when it's hot. But did you know that animals must do things like this too? Join us on an adventure to learn how an owl can hunt at night undetected, why trees shed their leaves in the fall, and just how do animals stay cool in a southern summer. Dive in and discover a whole new world of different creatures and the fascinating ways they survive in their surroundings.
- **Chillin' on the Chattahoochee:** Way down yonder in the watershed, the Chattahoochee is a habitat bursting with life and adventure. We explore the many ways of the river, its inhabitants, and how we all connect to our main source of water: The Chattahoochee River! Wander through our wetlands and learn about their significance and the importance of water conservation. The river is constantly changing and always has something new to discover!
- **Guardians of the Globe:** Every living creature impacts the world around them, from slow-growing oaks to busy beavers. Join us as we explore how plants and animals are continuously working to foster life, sometimes in ways we would never think of! We'll also take a look at our own role in the ecosystem, highlighting the work of some great conservationists and investigating small steps we can take to make a big difference in the world around us.
- **Scales, Slime, and Stingers:** The world is full of creatures that many people think are gross or scary. Explore and dispel common myths about this misunderstood group of creatures. Learn all about insects, reptiles, and amphibians. Get ready to go crazy for creatures who aren't so creepy after all. Take an adventure into the world of scales, slime, and stingers!
- **Wild in the Woods:** Just like the trees have roots, so do we. Discover the plants, animals, and history of the land we walk on. From the strong roots of Georgia's oak trees to the heights of the forest canopy, there is an entire world to discover. What animals and plants can be found in our native habitats? Set forth on an adventure of science and discovery in the woods to find out.
